

# ELECTRONIC VOICE PHENOMENA: THE MYSTERY OF INSTRUMENTAL TRANSCOMMUNICATION

José Ignacio Carmona

An complete and detailed introduction to the world of Instrumental Transcommunication (ITC), including the background, hypotheses, key studies, and the most unique research techniques for capturing voices from other planes of existence

## Synopsis

This is without question the definitive book for understanding electronic voice phenomena (EVP). The chronovisor, the work of Raymond Bayless, and the research of Jürgenson and Rauiva all form part of the history of ITC. You will also learn about the most notable hypotheses and the most utilized practical techniques for capturing voices that emanate from other planes of existence. Further, the book talks about the key studies, the most novel research techniques, and the most relevant historical antecedents, including the talking heads of Pope Sylvester II, Charles Steinmetz's invention to photograph the past, Robert Hare's Spiritscope, and Francis Grierson's telephone to talk to the dead. In short, this is a simple guide for a general understanding of EVP practices.

José Ignacio Carmona possesses more than 25 years of research experience and is a participant in one of the most important International research programs dealing with this subject. In this book, he explains all that is necessary for carrying out an electronic voice phenomena work, including the use and implementation of recording techniques, software, and digitalization, processing, and filing methods.

## Biography

**José Ignacio Carmona** (Toledo, 1969) is a researcher with more than 25 years of experience in the fields of parapsychology and mystery. He has participated in various communication media endeavors, including *Estigia* (broadcasting arm of CIFE, the Research Center on Strange Phenomena), *ITC Journal*, *Aol2002*, *Adimensional*, *Extrasensorial* and *Ars toletana*.
