Jesús Hernández

Conspiracies, secret agents, counterintelligence,  
coups and sabotage

## Synopsis

World War II not only took place on the battlefields, but also behind closed doors as all sides sought to organize secret operations that would take advantage of their enemies' weaknesses. To carry out these missions, many of which were practically suicidal in nature, valiant and daring men willing to risk their lives were recruited.

You will read about assaults, kidnappings, spy missions and coups executed in the heart of enemy territory - in other words, all types of operations designed to turn the tide of the conflict. Only a handful of them were successful.

This book explains these operations, many of which have been ignored by history books, but whose consequences in the development of the war were greater than what is commonly believed. This is the latest work from Jesús Hernández, the most prolific Spanish language specialist on World War II.
