Related books

Learn about the decisive change that made possible the world as we know it. The brilliant inventions and innovations; the movement from small workshops to the big factories; the lights and shadows of progress which marked the definitive separation of poor countries from rich ones.

Synopsis

Learn the history of the greatest transformation experienced by a human society since the discovery of agriculture, the revolution that made possible the world as we know it, the advantages and disadvantages of progress by which many human beings had to pay a terrible price of suffering and exclusion.

Look at the roots of the artisan era and see how the workshops of this period eventually turned into factories in Great Britain in the 18th century. Go on board an travel to India and return with the cotton-laden boats prepared to feed the incipient British textile industry.

Delve into the social ins and outs of a process that was successful for the nobility or the bourgeoisie, but was not successful for the farmers or peasants forced to emigrate to the city or to cross the ocean looking for the opportunities that their native lands had denied them. This is the story of workers toiling away in exchange for a miserable salary, or children who lost his childhood in the shafts of mines or on the floors of factories. Join the proletarians as they organize their fight to change things so as to share in the fruits of progress in a fair way.

Biography

Luis E. Íñigo Fernández (Guadalajara, Spain, 1966) has a degree in geography and history from the Universidad Complutense de Madrid, a PhD in history from UNED, and was the recipient of an award for academic excellence from a prestigious association of academics in Madrid. Currently he works as Education Inspector after almost two decades of high school teaching experience. As an author, he has written history books such as *Brief history of Spain*, *Brief history of the Alchemy*, *Brief history of the Spanish Second Republic*, and *Brief history of the World*.

Sales pitch

The work presents the Industrial Revolution as a global economic process in which technical, economic, social, political and spiritual factors interact.

Priority is given to the facts that explain the Industrial Revolution as a turning point between two worlds: the one inherited from the Neolithic Age and the present one.

It allows the reader to understand today's world from the knowledge of the past.

The author is a prestigious historian, writer of other titles of the collection.
