

ECONOMY IN 100 QUESTIONS

Popular knowledge

Santiago Armesilla

The answers of this modern social science to the big questions about the economic activity in society. The basic concepts and their practical application, microeconomics and macroeconomics, applied economics, and political economy, economic schools and the relationships between the economy, and other branches of knowledge.

Does knowledge of economics lift you up from the poor? Is economy a science like the others? Does economy serve to predict the future? Who generates wealth: the employer or the worker? Are economic crises inevitable? Why sometimes if the macroeconomics goes well the microeconomics does not go so well? Is it possible to have a tax-free society? Could we organize ourselves economically speaking without a state and use, for example, cryptocurrency? Is the welfare state the synthesis between liberalism and socialism? Is everything that works well economically legitimate, ethically and morally? Will we ever end up with poverty, and social inequalities?

Sales pitch

- A divulgation work on economy that selects the one hundred most relevant questions about this discipline explained with rigour, amenity, sharpness and intelligence.

- Its structure is not chronological or geographical. The structure of the book, and the collection, is due to the need to access to all the knowledge of this discipline without categorising it in watertight compartments, which allows to have a complete and global vision about economy. There will be blocks dedicated to concepts, some others to their branches, their practical application, their schools, etc.

- Just like the other titles of the collection, this work has an original format, that is illustrated, clear, and very didactic, since it raises all the knowledge on a subject in a format question-answer with a total of 100 large subjects.

-The work will dismantle some of the topics, and prejudices about this discipline that are caused by the deficient economic training that the average reader has. Thanks to this work the reader will complete this training on this scientific discipline, knowing the economic phenomena, its causes and consequences.
